

63. The invention of claim 1 wherein said at least one other system within said vehicle further comprises:

- (i) an entertainment system,
- (ii) a distress notification system,
- (iii) a heating and air-conditioning system,
- (iv) a vehicle safety system,
- (v) a light filtering system, and
- (vi) a unauthorized user/ignition enabling system,

64. The invention of claim 63 wherein said entertainment system further comprises a sound cancellation system.

65. The invention of claim 63 further comprising a mirror control system.

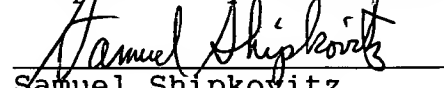

66. The invention of claim 63 further comprising a directional microphone.

67. The invention of claim 63 further comprising a suspension adjustment system.

CONCLUSION

The Applicant having made a Preliminary Amendment, supported by the specification of the application, believes that any ambiguities or misunderstandings that the Examiner may have had have been cleared up herewith, now believes that the Requirement for Restriction should be withdrawn, and that the above Response and Preliminary Amendment traverses the logic that the Examiner used to believe that a Requirement for Restriction was appropriate.

FOR THE APPLICANT
Respectfully submitted,

Samuel Shipkovitz
